

THE GLEICHEN CALL

VOLUME XXIX NO. 6

GLEICHEN, ALBERTA, WEDNESDAY

APRIL 22, 1936

SUBSCRIPTION \$2.00 PER YEAR

TOWN COUNCIL DEBATE THIS YEARS' ESTIMATES

The Councilors of the town met in the town office and held their regular meeting for April. All councilors and Mayor Ostrander were present. The secretary informed the meeting that at last nomination day no nominations were received. The councilors were of the opinion that it was useless to hold any more nomination meetings and that the councilors themselves should make an effort to have the vacant seats filled.

Much discussion took place regarding the water on the main street and the opinion was expressed that there was something wrong with the sewage system as the water was backing up into a couple of business houses. While deeply engrossed in this subject, L. Michael arrived on the scene and explained just what was wrong. Mr. Michael is familiar with the water and sewerage system of the town and explained that the sewers were too big, this allowed the solids to stop and the water to pass on, eventually the sewer pipes got plugged so that the water backs, this had been partially remedied but nothing much could be done until the ground thawed out.

Mr. Michael was present regarding a new furnace that is needed in the Community Hall. The old furnace was completely done and it had been torn down as it was unfit for further use. After due consideration the council instructed Mr. Michael to install another furnace right away. The members were informed the basement needed some fixing up. A certain amount of excavating had to be done and the floor raised as some of the props were giving away. Councilor Thompson thought it would require about a hundred dollars to complete this work satisfactorily. It was decided to place Mr. Thompson in charge of the work and have the basement attended to immediately.

When funds are available the ceiling of the Community Hall will be attended to. For it was stated that the hot air from the furnace disappeared in the cracks, this leaving the hall cold, besides it was a waste of coal. It was announced that it would cost in the neighborhood of \$100 to have the ceiling fixed. As the picture shows were not producing much revenue at the present time it was decided to wait and see if conditions would not improve when the weather got better then this ceiling question will be attended to.

A letter had been received from a Calgary hospital advising the admittance of a Gleichen patient. The secretary was advised to look into the matter. Councilor McConnell asked that a by-law be brought in at the next meeting governing the handling of the cemetery. As it was people could come and do what ever they wished in the cemetery grounds.

Business taxes, municipal taxes and school taxes next came in for discussion. Estimates for the year 1936 was figured out to a certain extent. At the next meeting the mill rate will be struck.

Councilors McKay and McDonald moved the adjournment of the meeting.

GLEICHEN UNITED CHURCH
Rev. J. N. Wilkinson, minister.
Mrs. H. Birch, choir leader.
Miss Jean Farquharson, pianist.
11 a.m. Church School.
7:30 p.m. Public Worship. Subject: "The Eternity of Religion."

In nearly every country in the world today there are organizations at work to destroy organized religion and then together with the indifference and half-heartedness of a large number who believe religion is needed but do little or nothing to make it effective are creating a condition in which many good people are getting discouraged for they think we are fighting a losing battle and are ultimately doomed to defeat.

Does the experience of the past and the teaching of history give us any clue to what the future holds for religion? Whether you think the Church is on the defensive and is ultimately doomed to disappear or whether you believe it will ultimately win out you will be interested in the treatment of this subject. There will be good music and a welcome for all at this service on Sunday night.

SCHOOL PUPILS CONCERT TWO NIGHTS NEXT WEEK

Next Wednesday and Thursday evenings, April 29 and 30 the Gleichen school pupils will entertain at a concert. This concert is exactly the same as they will put on at the coming school festival to be held in Bassano next month.

The concert will take place in the Community hall and the idea behind it is for the children to have a couple of rehearsals and raise funds to help defray the expenses of the trip to Bassano and other requirements of connection with the presentation of the dramatics.

In years gone by the programs of these concerts have been of a very high standard and the programs this year promise to surpass anything that has been attempted before.

BLACKFEET HAVE SPECIAL TRAIN FOR THEMSELVES

Friday the special train chartered by the Hockey Club for the purpose of taking a large number of Indians to Calgary was well patronized by the red men, squaws and paposes. Some where in the neighborhood of 300 called themselves of the opportunity to have a whole train to themselves. As the special pulled in about three quarters of an hour before it was due to leave all the Indians arrived at their state to handle the rest of the train before it stopped and were trying to scramble aboard. When the train finally pulled out all most every seat was occupied.

Thursday and Friday the Indian agency officials had been busy paying out lease money to the tune of \$25 to every man, woman and child, while the chiefs received \$50. The circulation of this money helped business considerably in both Cluny and Gleichen as all the stores and restaurants increased their trade. By the time the Indians got for Calgary a lot of them had no money, but that did not worry them. Arriving in the big town some where still affluent proceeded to the hotels and the white man's firewater and wound up in the cooler. Saturday night when the local train returns with five extra coaches and loaded with Indians attracted a lot of attention.

The Calgary Herald Herald in terms as how the Blackfeet were officially welcomed and accommodated.

Headed by Duck Chief and five lesser chiefs, each attired in official uniform, more than 200 Blackfoot Indians arrived in Calgary at 6 o'clock Friday evening by special train from Gleichen. They were greeted by representatives of the Calgary Board of Trade, the Calgary Exhibition and Stampede Ltd., and the Canadian Pacific Railway.

The tribesmen who had just received their treaty money, filled five coaches. Duck Chief was accompanied by Paul Little Walker, senior chief, and Philip Black Fat, Tom Turn Up Nose, Pilot Fox and Lynden Many Bears. The head chief bore his staff of office and all the chiefs were wearing their various decorations and medals. Earl Calf Child and George Crane Bear acted as interpreters.

The Board of Trade was represented by L. H. Fenerty, K. C., president; John H. Hanna, secretary; J. McNeill, Ernest Hensley and F. E. Osborne, E. L. Richardson and Charles M. Baker represented the stampede management, while John C. Pike, C. P. R. assistant district passenger agent also welcomed the visitors.

The visitors were not slow to avail themselves of the hospitality of the town and soon dispersed in whatever direction their fancy led. As there was a large number of paposes the problem of housing them for the night became important. R. C. M. P. officials obtained accommodation for many in local hotels but the services of the exhibition authorities had to be called in finally. Straw was put down at the pavilion and more than half of the tribesmen spent the night there.

Whales frequently live to be more than 100 years old.
The new tariff bill places skeletons on the front line. Now we may all afford to replenish our family closets.

LOCAL GIRL GUIDES ENTERTAIN AT MEETING PLACE

The bridge and cribbage tournament in the Guide Hall on Friday evening under the auspices of the First Gleichen Company of Girl Guides, proved to be an outstanding success.

The program which started with Guides Honor was followed by a demonstration of bandaging on the part of the Guides, who proved their ability at making the following bandages: head, dislocated shoulder, badly burnt hand and broken leg bandage. Next on the program was the singing of old time camp-fire songs around an artificial campfire, which was much enjoyed. A play followed in which a number of Guides participated.

The remainder of the evening was spent playing cards. The prizes were as follows: bridge, ladies first won by Mrs. James Young; consolation Mrs. W. P. Evans; men's first L. Sather; consolation, E. Evans. T. Downey won the cribbage prize while Joseph Guttman won the baby. A most delightful lunch was served.

Mrs. C. H. Goodwin, district commissioner, was chairman for the evening and at the conclusion of the activities gave a hearty vote of thanks to the leaders and the guides for the very splendid evening's entertainment.

OBITUARY EDWARD WEEKS

Edward Weeks, 20 year old son of Mr. and Mrs. William Weeks, residents of Crowfoot, died in the Bassano hospital last Thursday following a short illness from pneumonia. He had spent practically all his life in this district and was very well known in Gleichen as he worked for a couple of years for Wm. Ferguson. He is survived by his parents, one brother, in Winnipeg and a sister at home. The funeral services were held in the Gleichen United Church Sunday afternoon, with Rev. J. N. Wilkinson officiating and was very largely attended, after which interment took place in the Gleichen cemetery. The all-bearers were, Messrs. Earl Campbell, Gordon Walker, Jim Carrick, William, Thomas and Sid Robbison.

DASHES FROM CRAIGANTLER AND DISTRICT

Mrs. W. Dankworth spent Friday and Saturday in Calgary.

It is very good of the editor of The Call to give us a reminder of 20 years ago, it brings back old memories.

Henry Dankworth is sporting one of the latest head-dresses. Henry says nothing like keeping up with the times.

Mr. Lavridson was in Calgary for a day or two last week.

The school opened again after the Easter holidays, with all children reported in good health and the teacher gaining a little in weight.

The road south from Tom Envolverson is closed for a few days for repairs. The culvert in the coulee is washed out.

A number from this district took in the hockey game between the Leafs and Black Hawks in Calgary Monday night.

A farmer in the district lost his wallet last week, and almost his head trying to find it. At the time of writing the prospects of a still lower.

Mr. and Mrs. Carl Sheets were Calgary visitors on Saturday last. Carl says the Indians from Gleichen seemed to be enjoying themselves quite extensively.

Mr. and Mrs. Schreiber and son attended the farm sale at Tudor last week and the sale at Strathmore. Bailey says the old bus is good for a good many miles yet.

The party making a complaint to the municipal council about farmers making money pulling out of the mud and right has a good chance to sit in the mud till the roads dry up. Another case of the farmers being the goat. When a farmer starts

LOCAL NEWS ITEMS OF GLEICHEN AND VICINITY

A prairie fire occurred on the golf links south of town one day last week. It is not known how the fire started. Assistance was rushed from town in time to save the club house. About the only damage the fire did was to burn up a lot of grass.

The Indians wound up the dancing season with a big dance in their hall Monday night. A number of whites visited the dance and some were heard to say that the Indians had it all over the white man in dancing, since their style of dancing is much slower and less exhausting.

The Brownie Pack held their first birthday party recently, and several of the Brownies received their first year service stars. As a yearly "Good Deed" the Pack sent a contribution to the Junior Red Cross Hospital at Calgary for the King George Memorial cot and intend to make it an annual event.

Mrs. E. J. Garland entertained at a tea at her home in honor of her sister, Mrs. David Dobb and two daughters, Ena and Doris, of Black Diamond, who spent the holidays here. Those present were: Mrs. Schmidt, Mrs. Sather, Mrs. McQueen, Mrs. Don Swain, Mrs. Dobb, Mrs. Deshayes, Mrs. Lewis, Mrs. Downey, Mrs. H. Brown and Mrs. A. Guthrie.

FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

April 20, 1916
The council has set the mill rate for 1916 at 33 mills.

A bascule meeting for organization purposes was held last week with between 20 and 30 fans in attendance. The officers for this year are: President and manager C. Farrow; vice president J. A. MacDonald; secretary C. R. Solberg, Executive committee E. L. Malloy and R. Gilbert.

While crossing Crowfoot St., Saturday H. Brown of Standard was accidentally knocked down by an auto driven by H. Simmon and had his shoulder dislocated. Dr. Farquharson attended to him it is strange the notions a man sometimes gets when dazed by an accident. When Mr. Brown reached the doctor's office he had Constable Taylor count his wad of money and then the doctor but refused to take chloroform until he saw a preacher. None being available Mr. Gordon was brought in and without questioning him he asked him to count his money then he took the chloroform. Afterwards he handed Mr. Gordon \$10, who hesitated and then took it to Mr. Hyndman, treasurer of the Methodist church.

Miss and Mr. B. Tudhope have arrived from Calgary and with their father and mother are residing on Seventh Ave.

By all indications the Gleichen Creamery will be opened under new management.

A. H. Goodwin, formerly telegraph operator here has enlisted. Geo. Matthews, of the firm of Matthews & McDiney, has moved his wife and family to town and will reside here permanently.

No. 1 Northern 93, No. 2 C. W. cats 3 1/2 Flax 5161.

April 22 is Good Friday and a public holiday. Mr. and Mrs. J. C. Morton are rejoicing in the arrival of another baby girl at their home last Friday.

The authorities would not allow the soldiers their uniforms to help out the farmers during seedling. Saturday afternoon 22 autos were counted at one time on Crowfoot St. within two blocks. Quite a busy day this. With all these running about the authorities should see that the laws are strictly enforced before some serious accident occurs.

His tractor and pulls some of the mud hounds three or four miles he should receive some little token for same, although he gets nothing for butter and eggs.

WHY DOES HE STOP

What is the matter? We have the natural resources, we need what can be produced from them. We are willing to produce them. We do not do it.

FREE BOOKLET WHEAT POOLS ON THE AIR

This booklet is a compilation of radio addresses delivered during the season.

These give an understanding of the Wheat Pool's present objectives and the general philosophy of the movement.

Mailed free to all who write to the Publicity Department.

ALBERTA WHEAT POOL

Calgary.

The farmer is willing to raise the wheat, the pork-far more than he needs. He is willing to trade the surplus for clothes, for coal, for furniture, for building material. The weaver and the tailor are willing to make the clothes, the furniture maker is willing to make the furniture, the building material workers are willing to make the building material. They are all willing to trade their products for food or anything else they may need. But something hinders. What is it? "Hard times." That means that for a time—an indefinite time—it is hard to live. But why should one portion of time be harder to live in than another? It should not unless nature has refused to yield her increase, or man has refused to accept it. Man has never been known to refuse to accept nature's increase. He has never been known to refuse to do his part to assist nature to yield her increase. But periodically he stops. He stops while he begs the privilege of continuing and is denied. He stops while he stands in the bread line, he stops while his clothes grow old and shabby, he stops while his home is being sold over the heads of his loved wife and children, he stops while they become sick from undernourishment, he stops while he despairs he snatches a purse, he robs a home, he waylays a pedestrian, he stops while he goes to prison.

He goes out of the world in which he had been denied the right to live and have a home and family. He goes out of a world that in itself was bulging with its mercies, while some unseen hand, camouflaged with the words "hard times," was forbidding him to partake of its bounties. Surely there is mismanagement somewhere—ignorantly or intentionally. The wisest of human governments have always failed to solve the problem that concerns the people the most—that of getting a living. Probably they will continue to fail until the kingdom of heaven becomes triumphant, until the creator of the world and all that is in it, including man, solves the great problem of men's relation to his own kind and all other things in the world.

Miss Norla is in a position to give the horse-laughts the state tax department. She was left \$20,000 by Josephine Callaghan and it was decided that the legacy is not subject to the inheritance tax. Miss Norla is a mare.

Speaking of names again, Joseph Lawless was arrested for having a bottle of whiskey in his car.

The Century Of Science

Research work now being carried on in the laboratories of the world devoted to industrial progress and advancement of scientific knowledge is unlocking vast reservoirs of hitherto hidden facts and data to such an extent that their practical application to man's needs and welfare is bound to profoundly change habits and modes of life and work in the future.

Old and well accepted theories in the realms of astronomy, chemistry, physics, medical science, biology and other fields of science are being shattered almost daily as a result of the work which is being carried on by silent, bespectacled men and women in these research workshops and so rapidly are new discoveries being made and converted to the use of mankind that those who predict that the present century will go down in history as an era of scientific achievement are speaking with undisputed authority.

In fact, the achievements of the first third of the present century are sufficient in themselves to substantiate the claim for such an assertion even if, for some unknown and unpredictable reason, the work in this field were to be brought to an abrupt halt now.

One does not have to search far to find reasons for this remarkable advance into the sphere of the hitherto unknown and to explain why so much that has remained hidden for centuries is now being revealed in so great abundance.

One of the reasons is the large sums of money which have been made available for the prosecution of such work by wealthy philanthropists. Another is the discovery by commercial organizations that it pays them to devote a percentage of their earnings to the conduct of research work to assist them in unearthing ways and means of improving their products and of reducing the costs of production to enable them to achieve a paramount place in their field or to achieve it. Another is the now well known fact that almost every new discovery, or the search for it, opens the door for another one and often enough paves the way for several more. Thus, the work is not only progressive but cumulative and in more than mathematical ratio, something like rolling up a snowball.

Still another reason is the fact that so frequently, a discovery in one field of endeavor results in the perfection of new equipment which makes it possible to delve deeper into the mysteries of some other scientific realm or some other school of activity.

And these do not exhaust the reasons. There are others referred to recently by Mrs. O. Lazarus. Writing in a recent issue of the Christian Science Monitor an article dealing with developments in the arena of natural science this author said:

"Natural science arose partly out of man's desire to conquer nature and partly from his insatiable curiosity. From the earliest times man had never been content to live by bread alone. It had that within it which impelled it to seek out the mysteries of the world around. It is this curiosity which has forced men to make instruments which have enabled him to sweep the remotest of the starry heavens; to delve among the rocks in order to read from the history of the earth and those who have lived on it in ages past. In his eagerness he has even penetrated into the heart of matter and seen it dissolve into radiation."

The same writer sheds an interesting sidelight on the effect such work has on the minds of those who make new discoveries, when she says: "Every time he (the researcher) has forced open the locked doors in the Palace of Knowledge he has become humbler, and his conception of his one-time unshakable faith in the 'reality' of those things which his hands could touch and his eyes see."

It is unfortunate that in Canada sufficient recompense is not always given to the men and women who are devoting a lifetime to unlocking the mysteries of science for the benefit of the country and her people; at least, that is too often the case with those who are prosecuting their work under government agency. As a result, more adequate remuneration sometimes proves too tempting and they are lured away south of the international boundary to the great loss of this country.

When the benefits which accrue to the country as a result of the development of a trust resistant wheat—to quote an illustration—are weighed in the balance against the remuneration these trained experts receive it is not surprising if better offers from elsewhere for their services are sometimes accepted.

Talked Through His Hat

New York Man Had Radio-Equipped Silk Topper

An announcer wearing an "electric Easter bonnet," in the form of a radio-equipped silk hat, promenade with the Easter Sunday strollers in New York, describing the fashions and eavesdropping on conversations unknown to those on the sidewalks. The stunt provided a test of a new portable microphone "station." The range of the silk-hat broadcaster is about a quarter of a mile.

The human hair grows at an average rate of five inches a year in a temperate climate.

CONSTIPATION STOPPED AT ONCE!

"Constipation troubled me for months. Nothing seemed to do any good until I tried Fruit-a-tives. I brought quick and complete relief," says Mr. Huddleston, Pittsfield, Ont. Fruit-a-tives are the discovery of a famous Canadian physician. He concentrated extracts of APPLES, ORANGES, FIGS, PRUNES and HERBS. The result is a natural remedy scientifically prepared for best results. Convenient—as an easy-to-swallow tablet. Soft—do not contain harsh purgatives or habit-forming drugs. More than a laxative—Fruit-a-tives bring lasting relief. They tend to strengthen all organs of elimination. Their tonic effects help the entire system.

Fruit-a-tives

Enjoys Life At Goldfields

Well-Worth Trying Says Wife Of Resident Doctor

Completing her first season in one of the north's new mining camps, Mrs. E. N. Dunn, a bride of one year, says there is nothing like joy-riding in a dog sleigh.

The young woman, wife of Dr. E. N. Dunn, resident doctor at Goldfields, Sask., accompanied her husband to the Lake Athabasca mining field last fall.

During a brief stopover at Edmonton after a long aeroplane flight from the northern mining town, she said, "I enjoy the life very much. It's all very novel, and it's well worth trying."

Goldfields has a pleasant social life, she added. About 30 women and 300 men comprise the camp. Bridge, dancing and dog sleigh riding are in great favor. In addition she often travels with her husband.

Returns Show Increase

Returns for the 1935 Christmas campaign to raise funds to fight tuberculosis were encouraging and final receipts were expected to show a 10 per cent. increase over 1934, the Canadian Tuberculosis Association announced. The association will hold its annual meeting at Vancouver, June 22, 23, 24.

Soviet workers are boring an oil well on the sea bottom in the vicinity of Baku. 2146

Going In For Ice Cream

London Is Preparing For Big Sale This Summer

Warm weather ice cream fashions are being determined at the Ice Cream and Dairy exhibition at the Crystal Palace, the London News-Chronicle remarks:

"This summer, it seems, we shall consume at least 50,000,000 gallons of ice cream, so that the rehearsal now in progress is thoroughly justified."

"It will be bought from penny-in-the-slot machines, in special paper bags, in tubes of chocolate and in new waffle wafers, which make it look as if you get more for your penny than you actually do."

"And it will be better ice cream. The milk marketing board has arranged for ice cream manufacturers to buy milk at bulk wholesale prices. Milk powder from abroad has been widely used so far."

"The immense engineering industry that has grown in recent years to meet the needs of the big milk distributive combines should give those now engaged in the milk prices inquiry some idea of where the money goes."

Richly Clad Mummy Found

Is Believed To Be Daughter Of Great Pharaoh Cheops

The sumptuously-clad mummy of a princess of the Fourth Dynasty (3733-3566 B.C.), believed to be the daughter of the great Pharaoh Cheops, who built the second pyramid, has been discovered by Egyptian archaeologists.

The mummy lay in a limestone sarcophagus, in an undisturbed tomb whose location was not revealed in the announcement of the find. Dressed in bridal raiment, the princess wore a golden diadem, two necklaces of golden beads, anklets and sandals.

A gold-plated copper belt circled her waist and the fingers of her left hand were encased in gold as well, it was said.

Prof. Selim Hassan of Cairo University, directed the excavations which resulted in the discovery. He said the tomb apparently had never been pillaged by marauders. Like most monuments of ancient Egypt.

Welsh Discovered America

Landed 300 Years Before Columbus Made His Appearance

The legend of the white Indian, and the claim that America was discovered by a Welshman, were revived at Cardiff, Wales, recently during a Welsh book festival, when books relating to the part played by Wales in world history were exhibited.

Legend has it that the American continent was discovered by Prince Madoc in the twelfth century, 300 years before Columbus. Madoc set sail from North Wales across the Atlantic with a fleet of 13 ships and never returned.

It is declared that he landed near the mouth of the Mississippi and worked his way inland. His men made friends with the Indians, and ultimately formed themselves into a tribe of white Indians.

Broadcast In Eskimo

Bishop Of The Arctic Talked To Charges In The North

A bishop's voice rang through the air for thousands of miles on a recent Saturday to carry a greeting in Eskimo to slant-eyed friends who sat before radio sets from the sub-Arctic fringes to Oache Peninsula, Rt. Rev. A. L. Fleming, Bishop of the Arctic, whose Diocese extends across the great expanse of winter's twilight land, spoke in English and Eskimo to his friends and charges in the north, broadcasting from Ottawa on the Canadian Radio Commission's Northern Mission program.

Likes Exploring Job

Ellsworth Hopes To Do More Of It In Antarctic

Lincoln Ellsworth, who recently completed an air journey across the Antarctic continent, said he would like to explore the Australian desert by camel. He had no definite plans, however, for the venture.

Ellsworth said in an interview there was a 100-year job of exploring still to be done in the Antarctic and he expected to do some of it. The explorer landed in Los Angeles in March after an absence of almost a year.

John D. Rockefeller says that the first money he ever earned was made by raising turkeys when he was seven years old. His mother gave him curds from the milk to feed them.

Do You Ever Wonder

Whether the "Pain" Remedy You Use is SAFE?

Ask Your Doctor and Find Out

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

THE person to ask whether the preparation you or your family are taking for the relief of headaches is SAFE to use regularly is your family doctor. Ask him particularly about "ASPIRIN."

He will tell you that before the discovery of "Aspirin" most "pain" remedies were advised against by physicians as bad for the stomach and, often, for the heart. Which is food for thought if you seek quick, safe relief.

Scientists rate "Aspirin" among the fastest methods yet discovered for the relief of headaches and the pains of rheumatism, neuritis and neuralgia. And the experience of millions of users has proved it safe for the average person to use regularly. In your own interest remember this:

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

New Electric Trains

One Of Longest Electric Trains Will Be Completed Next Summer

Rapid progress with the electrification of the Southern Railway's main line to Portsmouth harbor makes it likely that the whole scheme, costing nearly \$15,000,000, will be completed by July, 1937.

Some 65 route miles, corresponding to 242 single track miles, are to be converted, and when finished the 74 miles from London to Portsmouth will be one of the longest electric trains in Britain.

The present longest stretch is the London to Eastbourne, Hastings and Ore section opened last July.

Forty-eight new four-coach motor units, 19 of which will be provided with kitchen-cars, are among the new rolling stock being constructed.

Tourists Will See Things

Parry Sound, Ontario, To Have Totem Pole Traffic Light

The eyes of a moose, alternately blinking red and green from atop a mighty totem pole, will help direct tourist traffic through Parry Sound, Ontario, this year. Plans for the totem pole traffic light were explained to the Ontario Good Roads convention by J. M. Daly, Indian agent from Parry Sound. The pole will be a vast affair, facing the highway, and the images carved on it, from top to bottom, will include the moose, a bear, a deer, two geese, duck, an early Canadian voyageur in a canoe, a tepee, a school house, and a church. The eyes of the moose, co-ordinated with traffic signals, will be the only animated portion.

There are approximately a half million different sorts of living creatures on the earth. About three-fourths of this number are insects.

European red ants attack other species of ants and carry off the workers as slaves.

Trying Old Experiment

New Jersey Doctor To Use Surgical Grafting Principle

Sixteen-year-old John Seeley's hope for artificial restoration of the arm he lost last November under the wheels of a train at Nutley, New Jersey, rested to-day on application of a 65-year-old surgical grafting principle.

A Newark orthopedic surgeon, starting with an operation at Beth Israel Hospital, expects to apply the discovery of an Italian physician, Vanghetti, about 1870, using muscle grafts to connect artificial limbs.

The surgeon, who has asked his name be withheld, has been engaged by the crippled children's committee of the Nutley Elks Lodge. As he described the operation, a flap of the patient's skin is drawn into a tube and inserted under the muscle. This operation will be performed twice on each of the stumps of Seeley's arms.

When the tissues have healed, he said, cheiropastic arms would be attached to the flaps. The artificial arms and fingers then would be operated with the flexing of the muscles.

New Device Invented

Artificial Ear Gives Effect Of Sound On Human System

An artificial ear, for the exact measurement of sound, and its effect on the human system, has been invented by an electrical firm at Prague. It is to be used by the Czechoslovak Ministry of Health in its investigations into the noise problem. Previous sound-measuring devices are stated either to have been too subjective, which has led to inaccurate results being obtained and difficulty in calculation, or they have not measured the true effect of various sounds on the delicate mechanism of the human ear. The new device, it is claimed, represents exactly, in an easily measurable form, the way in which sound affects the ear of a living person.

Ships Without Funnels

Prediction Made That Smoke Will Be Discharged Into Sea

Funnelsless ocean liners in the near future was a prediction made by John Johnson, chief engineer of the Canadian Pacific Steamships, Ltd., addressing the Institution of Mechanical Engineers at London, England, recently.

Speaking on the future of steam propulsion, Mr. Johnson said that smoke and gases from the furnaces would be used until they were almost cold, the heat extracted from them being put to use for work.

The gases would then be washed with sea water, and, when clean, they would be discharged into the sea just above the water level.

His Only Worry

The doctors had great difficulty in getting a negro soldier, who had been badly wounded by shell-fire, to take an anaesthetic. He seemed worried about something, and urged them to get to work without an anaesthetic, as he wanted to watch them.

At last they got him to take the chloroform, and all went well until the operation was over.

The stitching was just being begun when he jerked himself back to consciousness and said: "Doctor, don't make a mistake. Don't stitch me with white thread."

Animal Day In China

In observance of Animal Day in China recently not an animal was killed in the country for 24 hours.

All slaughter houses remained open but not one head of live stock was taken in and cities refused to do away with trays in pounds. The Society for the Prevention of Cruelty to Animals gave open-air dramatic and oratorical messages on kindness to dumb beasts.

A tall is attached to a kite for balancing purposes.

Chinese fondness for taking food and drink hot is found to be one handicap in pushing sales of electric refrigerators among China's millions.

A tall is attached to a kite for balancing purposes.

The Rocky Mountains Call

Two of the most democratic societies in the world, whose membership includes a former king and queen, famous statesmen, and common folks, all on an equal footing, are the Sky-Line Trail Hikers and Trail Riders of the Canadian Rockies, whose annual outings this year promise something new in the way of scenery and energetic healthy recreation.

The Trail Riders, whose five-day trip starts from the Banff Springs Hotel on July 31, will tour a section of the Park which was chosen by Major P. J. Jennings, superintendent of Banff National Park, for the interesting variety it offers. The centre of activities for the Sky-Line Trail Hikers, from August 7 to 19, will

be Lake O'Hara, probably the most beautiful spot in the Rockies. In both cases there is splendid fishing in swift-running mountain streams, and unlimited opportunities for the camera enthusiast.

The Trail Ride actually begins about four miles from Banff, winds its way between Mount Dith and Mount Norquay, follows Fortymile Creek east of the Sawback Range, passes over Hinder Pass, follows Johnston Creek down to the end of the spectacular canyon of the same name, and ends up near the highway where there is an ideal spot for the Pop Wow and Sing-Song that concludes every Trail Ride outing. It provides five care-free

days with fine open Alpine meadows, high passes, good timber, and lakes and streams of great beauty.

Plans for the Sky-Line Trail Hike make provision for one central camp at Lake O'Hara. This will avoid changing camp every night as has been done in the past and will reduce the cost of the outing considerably. From Lake O'Hara the hikers will make forays of adventure over the Moss Lake trail to Lake Louise; through the Narrows Lake district; along the spectacular Cataract Creek to the limpid beauty of Lake McArthur and along the McArthur creek trail; and southeast through the valleys of lofty Mounts Yukness, Humabee, and Wanchama.

Town & District

A. Wertz, a prominent business man of Cluny paid this office a friendly visit for a short time one day last week.

While in Calgary our Indians entertained over the radio much to the delight of the Gleichen listeners in.

Mr. and Mrs. Ady of Calgary spent the week end in Gleichen visiting friends. This week they are moving to Innisfail where they will in future reside.

Arthur Brown and Phillip Murphy of Detroit, Mich., who have been holidaying here for the past several months left Thursday for Detroit via Chicago.

One evening last week the Guides and Scouts held a party in the Scout hall. The Scouts brought in a gramophone, but were very shy when it came to dancing. It was suggested it was less year, but this was not altogether satisfactory. After a game the Scoutmaster said he would take five points off each patrol if the Scouts would not dance. A good supper was then put on by the Scouts and then the party broke up.—Communicated by a Scout.

St. Andrew's Junior W. A. attended a rally at St. Stephens, Calgary last Saturday. The girls attending were Margery Gorrell, Dorothy Bogstie, Peggy Bogstie, Rachel James and Gace Deshayes. The address of welcome was given by Betty Ragg of the Protestant Branch, and responded to by Rita Halstead, Gleichen. Mrs. J. Gorrell assisted Mrs. Deshayes in taking the girls to the city.

Return of wild geese and ducks and the presence of the familiar varieties of song birds migrating from the sunny south, indicates that spring has at last arrived in Alberta despite the snow flurries Monday. The last few days of last week were particularly fine and the song of the Meadow Lark cheered the hearts of many who have looked in vain for sometime past for welcome spring-like weather. The moisture situation for this year is better than it has been for many years and many are predicting bountiful crops. It is to be noticed that the country is dotted with lakes and sloughs filled for the first time in some years.

Mrs. Peter Downey entertained at miscellaneous shower for Mrs. Albert Robinson, formerly Miss Blanche Desjardine, on Thursday afternoon. Following a very delightful luncheon, Miss Esther Downey and Miss Jean Black presented the bride with a cleverly decorated basket, which was arranged by Miss Esther Downey, which was filled with presents. The bride was the recipient of many lovely gifts. Among those present were: Miss Peggy Yates, Mrs. Gertrude Mrs. Irene Phillips, Miss Alison Evans, Mrs. Sather Mrs. Thorburn, Mrs. Pincau, Mrs. Plant, Mrs. Boos, Mrs. Suchy, Miss Lilly Curriek, Miss L. Hunter, Mrs. Krause, Miss Jean Farquharson, Mrs. Ruby Hayes, Mrs. Woods, Mrs. Menard, Miss C. Plante, Mrs. Albert Robinson, Mrs. Rishaug, Miss A. Hunter, Miss Virginia Taylor, Mrs. Lester, Mrs. Rodninski, Miss Maureen Young, Mrs. Lindquist, Miss Louise Allast.

Opportunities for out of town sons and daughters to entertain their mothers on Mothers' Day, Sunday, May 10, or fathers on Fathers' Day, a little later, are being given this year by the Canadian Pacific Railway according to announcement by G. C. Carter, general passenger agent of the company. For these two important days in the lives of all parents, the Canadian Pacific Railway is featuring a delivery service of railway tickets, whereby a son or daughter can pay for the transportation at the nearest Canadian Pacific office in the municipality where he resides, and the order will be sent by telegram to the parent's home town office and delivered directly to the home without extra charge. This service proved very popular last Christmas and New Year's and is expected to provide a happy holiday for parents with out-of-town children on Mother's or Father's Day this year.

ROBINSON-DESJARDINE

A very quiet wedding was solemnized in the office of St. Victor's Church when Mary Blanche, daughter of Mr. and Mrs. George Desjardine of Gleichen, was united in marriage to Albert William Robinson, only son of Mr. A. T. Robinson and the late Mrs. Robinson of Gleichen. Rev. Father McCormack officiated. Following the wedding a supper was served at the home of the bride's parents, only immediate relatives attending. Mr. and Mrs. Robinson will reside in Gleichen.

FATALITY OF DISEASES

"You were told that you must have any one of the well recognized diseases and take your chances on recovery, which would you choose? According to two eminent physicians who have studied the percentage of fatalities from various diseases, you best bet would be to choose having the measles.

For they have found that only four-fifths of one per cent of cases of measles prove fatal. On the other hand, the most deadly of acute diseases is lockjaw, which is also one of the most horrible.

Yet lockjaw is not necessarily fatal, as many believe. In fact, it is nowadays fatal in only 41 per cent of cases, considerably less than one-half.

Among the more common diseases, pneumonia is the most deadly. Still, even in this most serious malady the mortality rate is only 17 per cent.

These figures, are assume, are based upon the assumption that no other complications are present. As a matter of practical experience, a very great number of deaths are due not merely to the acute disease which may be the preponderant factor, but a combination of causes.

The man who sells goods over the counter does business in the open. He cannot hide behind a corporate name or talk to a displeased customer from behind locked doors of a private office. He knows that he must face the music in case he is a party of any transaction that won't stand the light of day. He knows that he must satisfy every customer or with whom he may be dealing, or he will lose not only that customer but probably others who will soon know all the facts if he does not do the square thing by one of his patrons.

Here is a real offer that will save you money . . . Give yourself and your family lasting enjoyment and entertainment the whole year through . . . This is all you have to do.

Select any 3 of these famous Magazines
Together with your local Newspaper
